

THE UNIVERSITY OF  
NEWCASTLE  
AUSTRALIA

# GEOS3280

## Global Change Field Course

# Semester 2, 2018

The course comprises an 8 day intensive field trip to the Southern Island of New Zealand and a laboratory project. Students will engage in observation of evidences of past climate changes, glacial cycles, modern glacier fluctuations and the effect of “geology in action” on the landscape of the last 2 million years.
